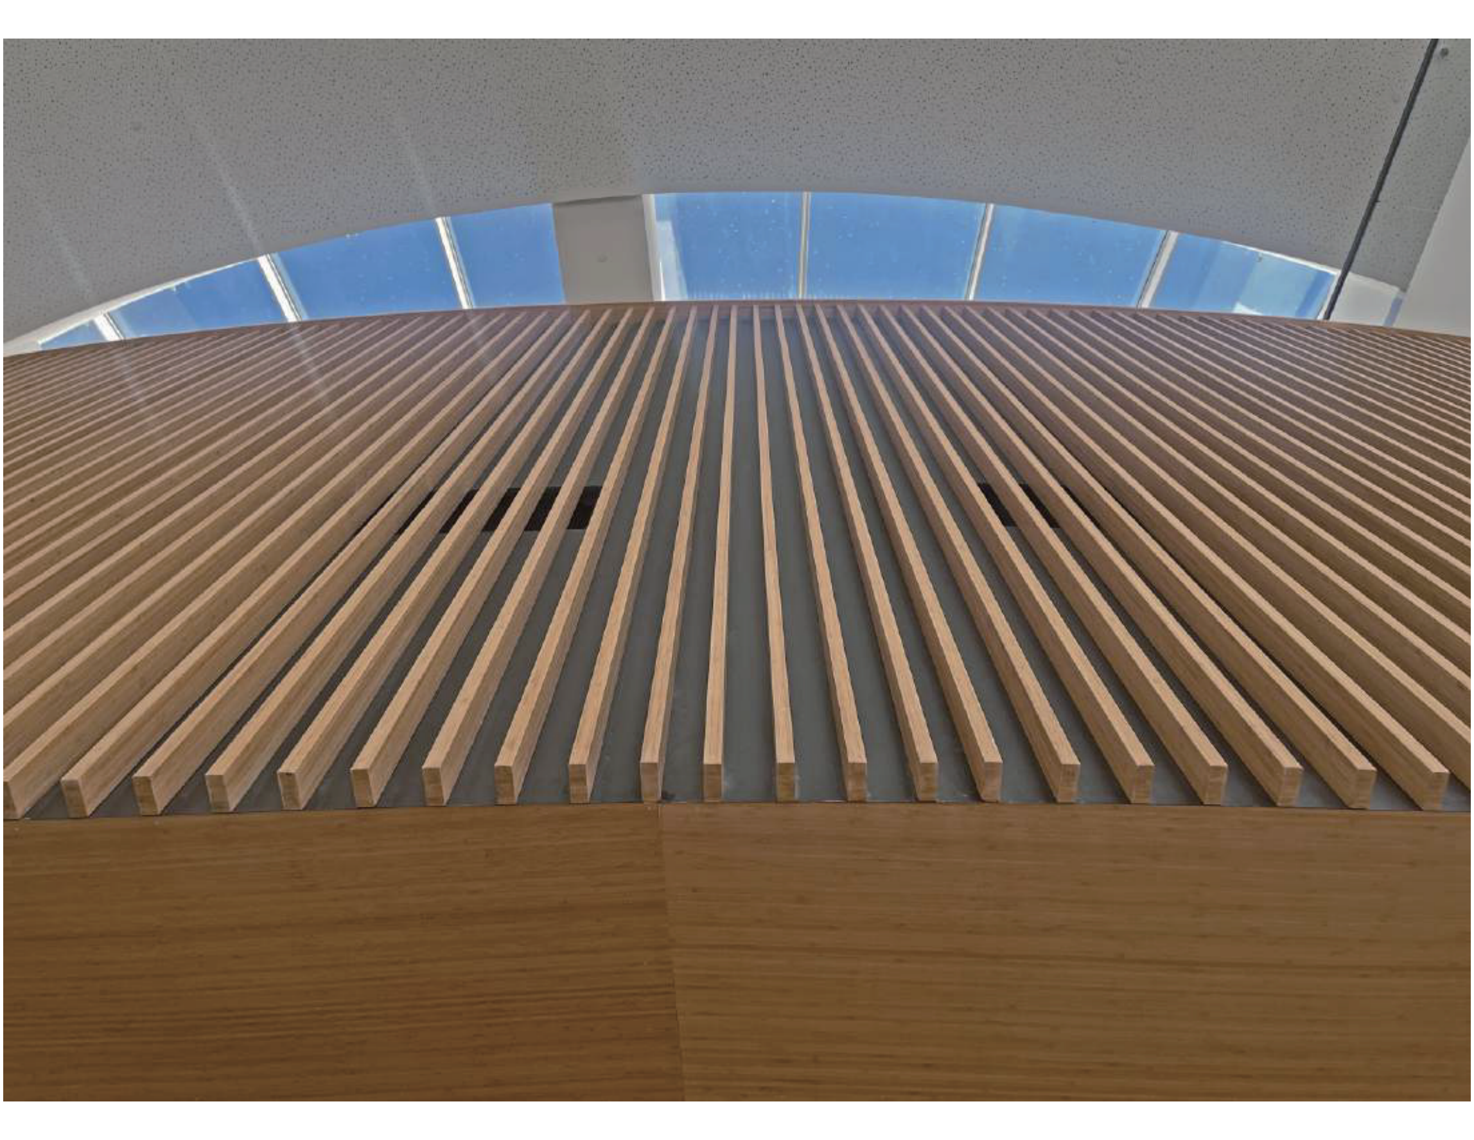
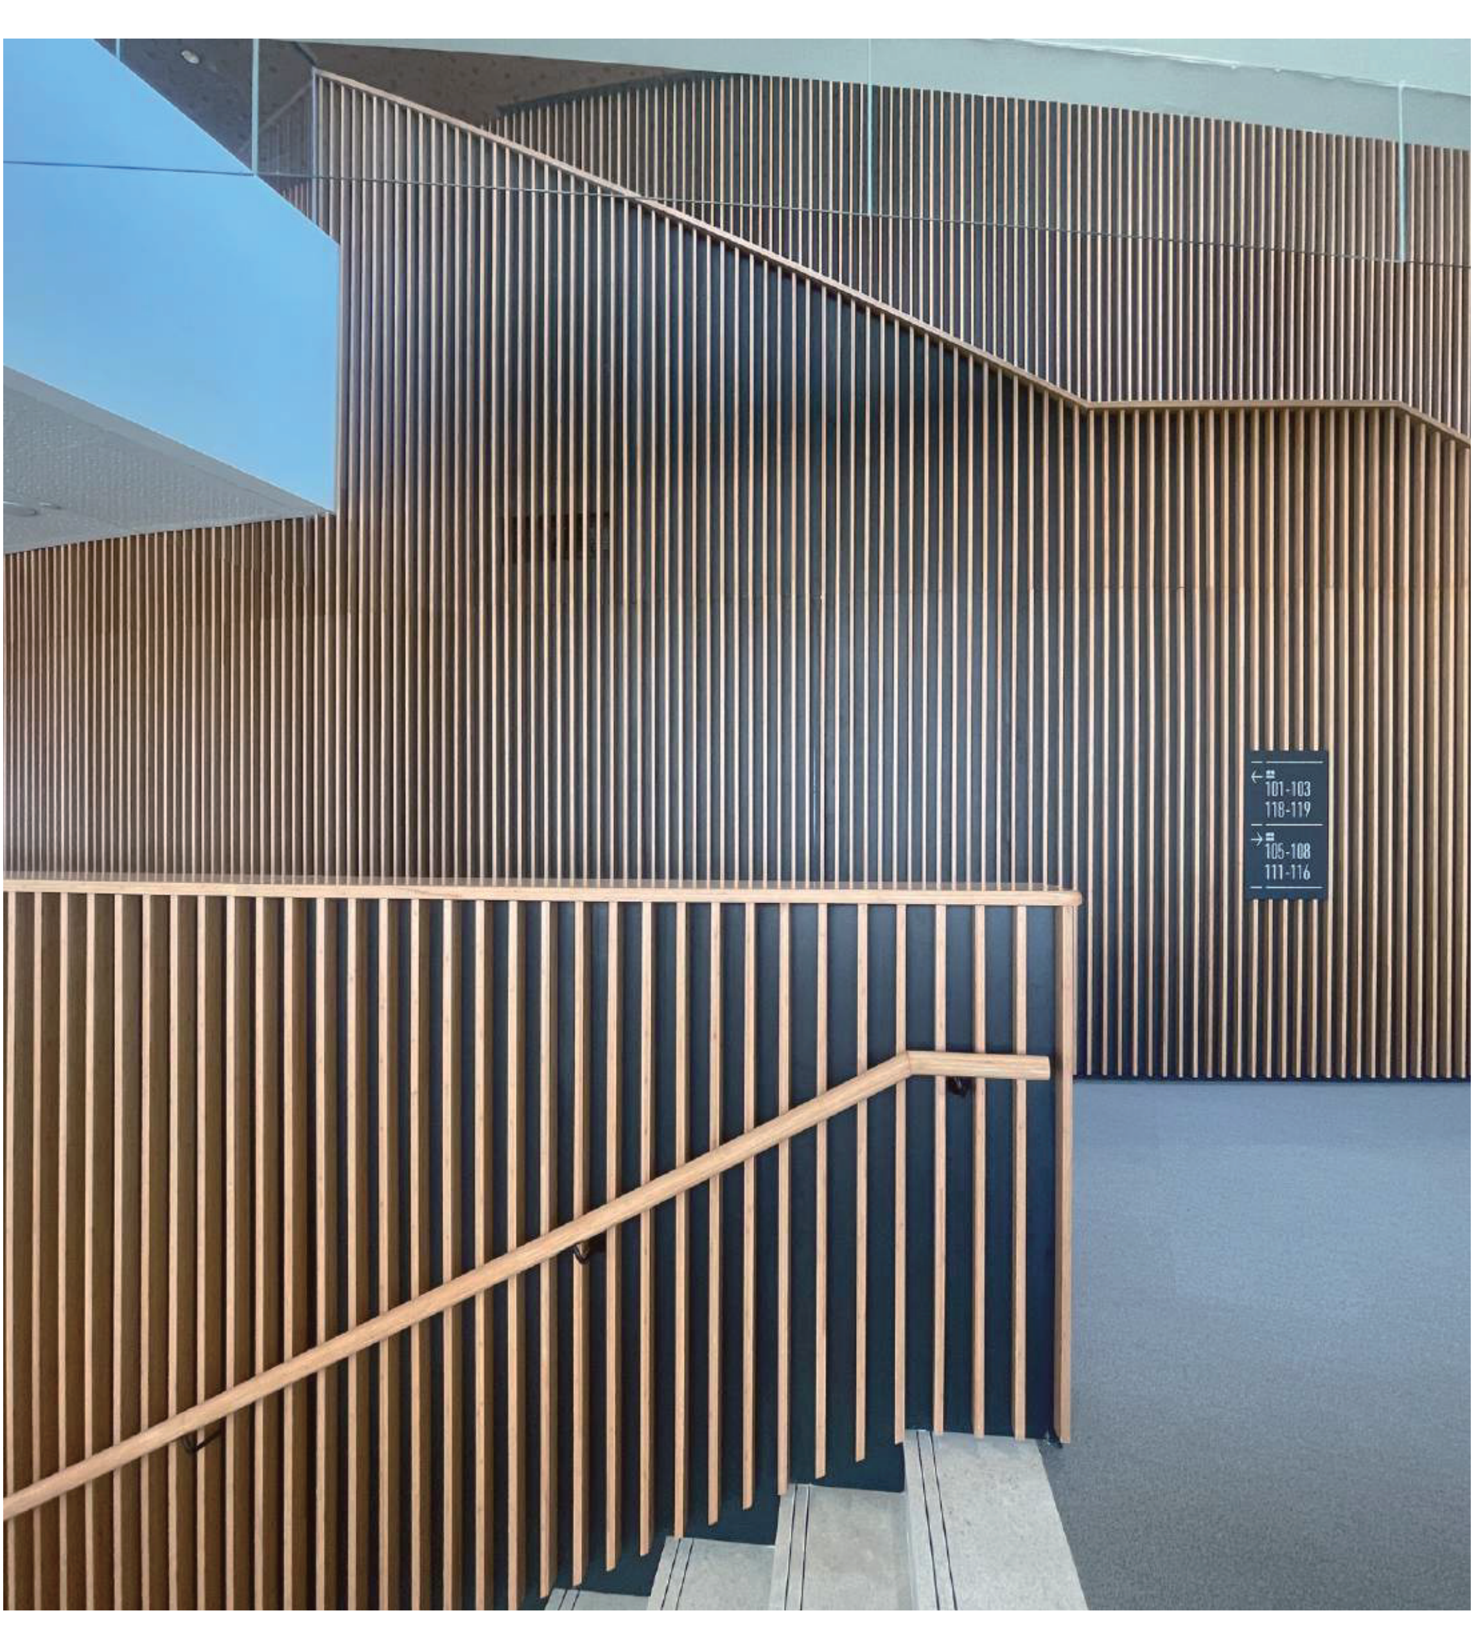
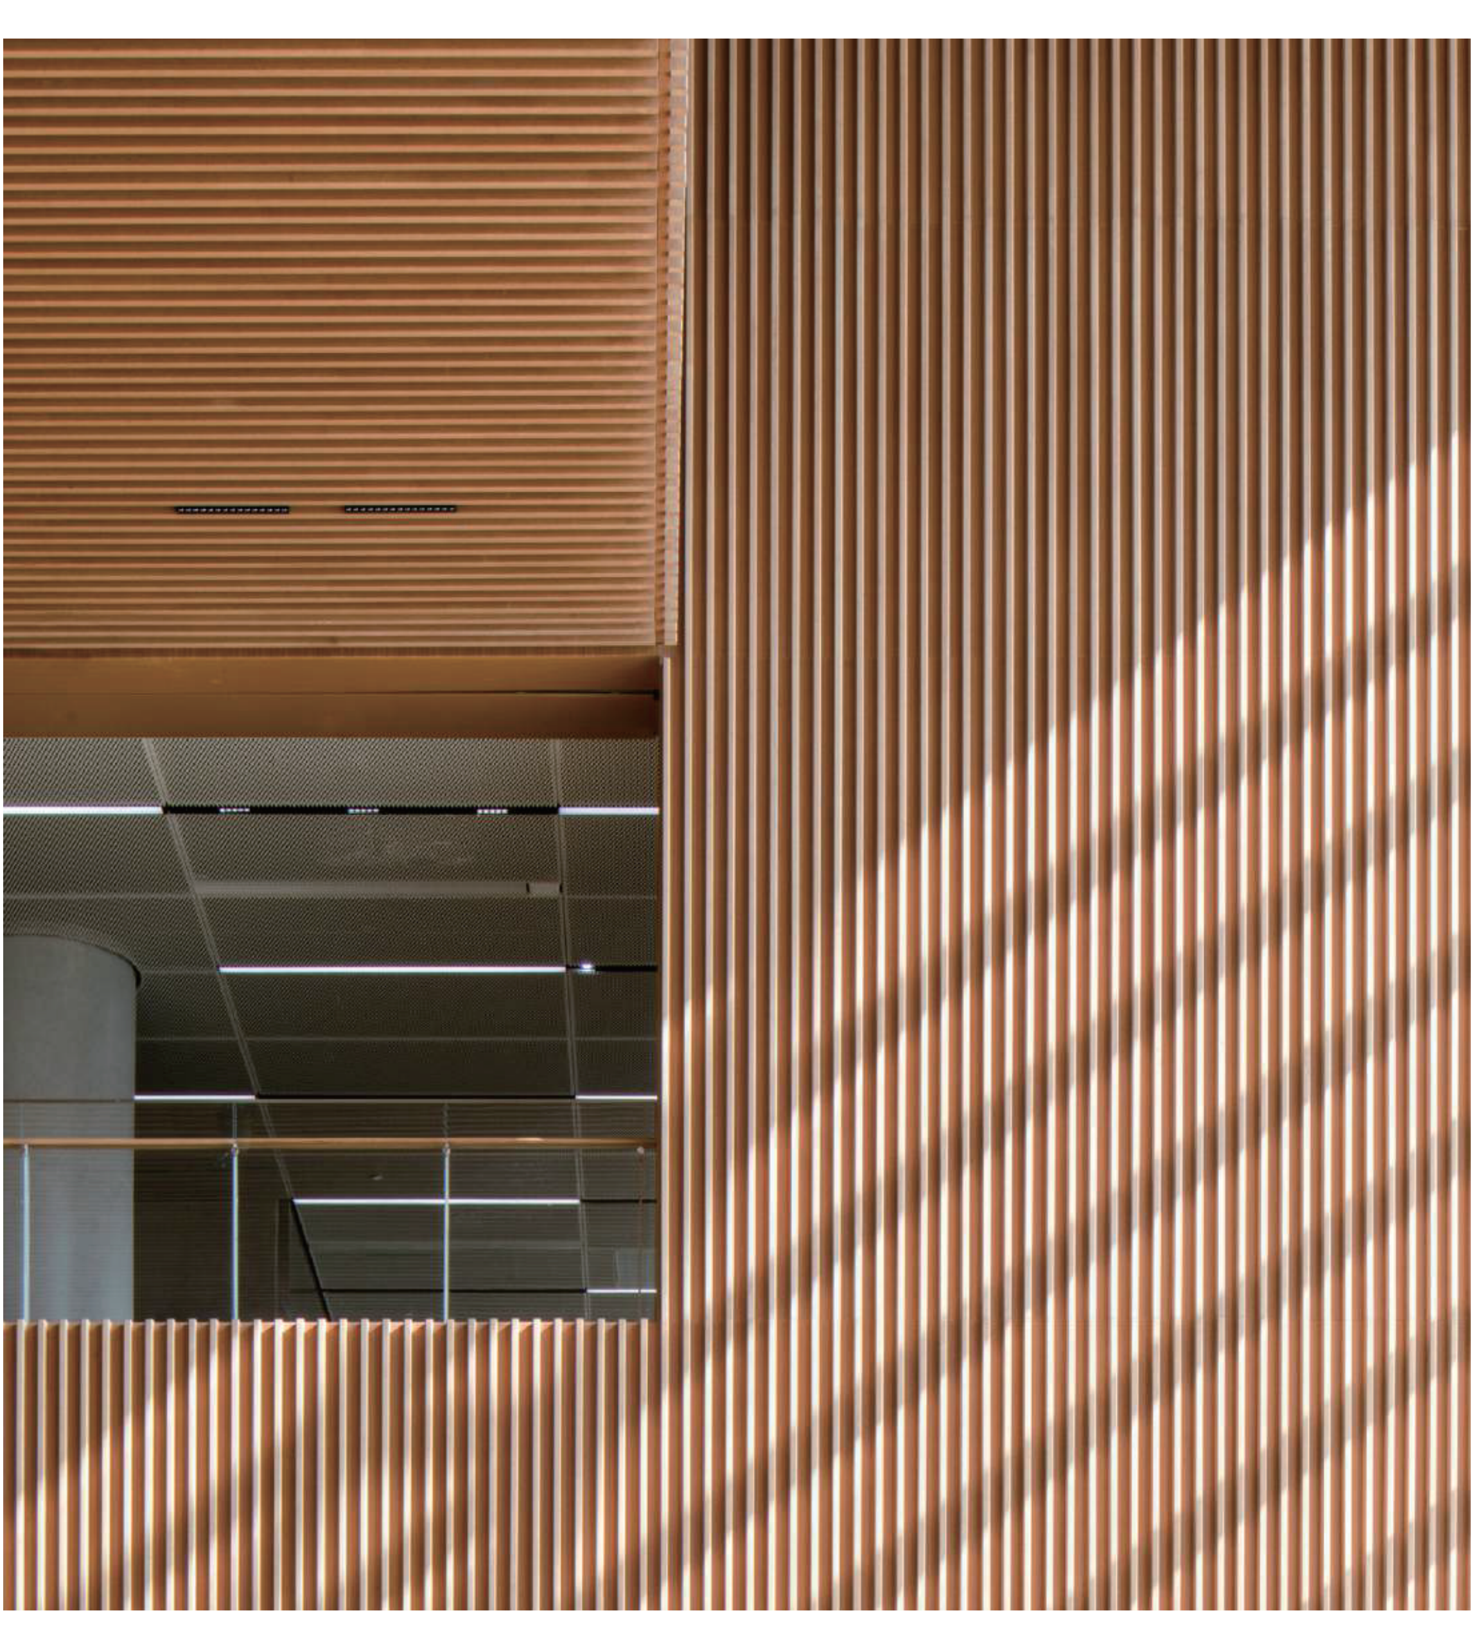
Bamboo Can Create A Calm, Serene Atmosphere In Any Space



GREEZU BAMBOO & WOOD



GREEZU BAMBOO & WOOD



Bamboo is a versatile, fast-growing, and sustainable resource that has been used in construction and design for thousands of years. In interior design, bamboo is often used in furniture, flooring, wall coverings, and other decorative elements. The look and feel of bamboo is warm, natural, and organic, adding a touch of nature to any room. The color and texture of bamboo can range from pale, blonde hues to dark, rich browns, and the material can be finished in a variety of ways to suit different design styles. Whether it's in the form of bamboo furniture, bamboo flooring, or other bamboo elements, a bamboo interior can create a calm, serene atmosphere in any space.

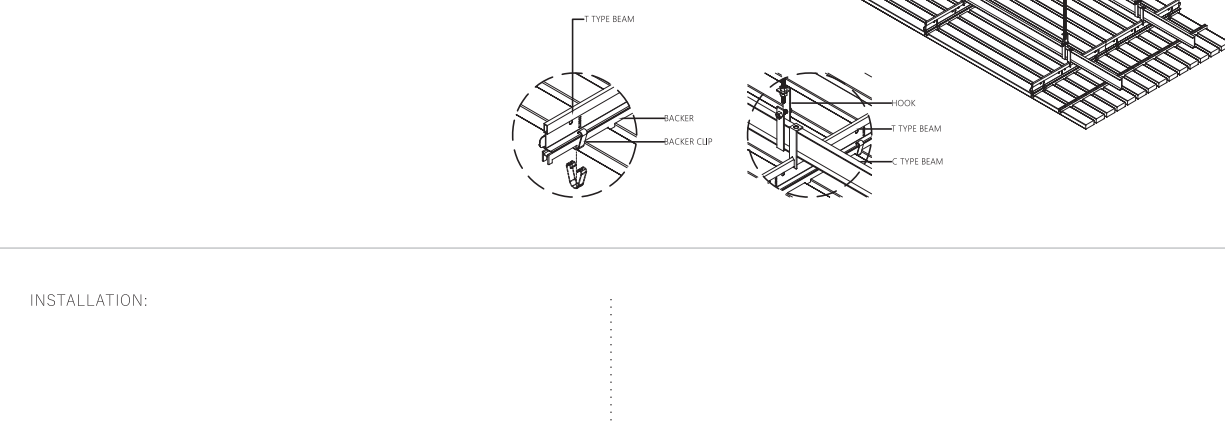
INSTALLATION:



Technical Data:
•Density: ±680 kg/m3
•Janka hardness: 1,380 lbf
•Moisture content: 10%-14%
•Formaldehyde emission: Class E1---0.72 mg/m2.h (EN 717-2)
•FCS Certified available on request--FSC Certificate Code: C135631
•Fire-resistant available to Bfl-s1 class on request (En13501)
•Durability test: CLASS 1 according to EN 350 / CEN/TS 15083-2, Class 4 for EN 335
•Fungi resistance: strong fungi resistance according to EN 846
•Water absorption and thickness swelling:
Water absorption: 8.9 %
Thickness swelling: 1.0% (ASTM D1037:2012)
•Linear expansion with change in moisture content: 0.1% (calculated between 50% and 90% relative humidity) (ASTM D1037:2012)
•Thermal conductivity: 0.39 W/(m.k)(EN 12524)
•Contribute to LEED
•Contribute to BREEAM
•Contribute to BEAM Plus
